Product Description

TEC Sapphire Contact Cooling Permanent Laser Hair Removal Machine

Product Description:

The Hair Depilator Machine is a stationary, vertical device that delivers up to 120 J/cm² of energy density and has a machine power of 1200W. This makes it perfect for use on all skin types - I-VI - and ensures that it will be effective in removing hair from any part of your body that you want.

This Unwanted Hair Remover Device is easy to use and has been designed to make the hair removal process as painless as possible. It uses laser technology to target the hair follicle and destroy it, preventing future hair growth and leaving your skin smooth and hair-free. Not only is our Hair Removal Laser Machine incredibly effective, but it is also safe to use. It has been designed to ensure that it does not damage the surrounding skin and has been approved by dermatologists as a safe and effective hair removal method.

So, if you're tired of constantly having to remove unwanted hair, the Hair Depilator Machine is the perfect solution for you. It is a Permanent Laser Hair Removal Machines that delivers powerful results while also being safe and easy to use. Say goodbye to the hassle of hair removal and hello to smooth, hair-free skin with our Hair Removal Laser Machine.

Applications:

With a power rating of 600W and pulse duration of 10-400 ms, this laser hair removal machine is capable of delivering powerful and precise results without causing any discomfort or pain. The machine power rating of 1200W ensures that it can handle continuous use without any issues.

Equipped with an other laser type, this hair removal machine is designed to provide effective hair removal solutions for all skin types, including dark and sensitive skin. The laser technology used in this machine offers permanent hair reduction, making it ideal for use in a variety of settings.

One of the key features of this hair removal laser machine is its safety features. The skin contact cooling system ensures that the skin is protected during the laser hair removal process, while the automatic power cut-off feature ensures that the machine is turned off in case of any malfunction. These safety features make it a reliable and safe option for use in a range of settings.

The NGY-1 Hair Removal Laser Machine is ideal for use in spas, salons, and clinics that offer hair removal services. It is also a great option for individuals who want to enjoy the benefits of laser hair removal in the comfort of their own home. The machine is easy to use and comes with detailed instructions, making it an ideal choice for both professionals and home users.

In conclusion, the NGY-1 Hair Removal Laser Machine is a reliable and efficient hair removal system that provides painless and permanent hair reduction. With its advanced laser technology and safety features, it is ideal for use in a range of applications and settings, making it a great investment for anyone looking to offer hair removal services or enjoy the benefits of laser hair removal at home.
